

Unable to open browser-based VideoViewer due to inadequate OnGuard user permissions

Last Modified on 01/12/2022 12:41 pm EST

Symptom

Unable to open browser-based VideoViewer due to inadequate OnGuard user permissions.

Resolution

The minimum permissions that must be set in the Users folder in System Administration to enable a user to access the browser-based VideoViewer are:

- System Permission Group > Video Hardware > Video devices
- System Permission Group > Access Control Hardware > Alarm panels
- System Permission Group > Users, Directories, Certification Authorities, Logical Access > Permission groups

- Monitor Permission Group > Monitor > View
- Monitor Permission Group > Video > Live video
- Monitor Permission Group > Control > Control
- Monitor Permission Group > Control > Camera PTZ (If you wish to grant permission to use PTZ.)

Applies To

OnGuard (All versions)
