

Why can't I set the recorded frame rate higher than X frames per second?

Last Modified on 05/22/2025 9:22 am EDT

Question

Why can't I set the recorded frame rate higher than X frames per second?

Substitute X for whatever rate of frames per second is in use.

Answer

OnGuard automatically limits the recorded frame rate to be no higher than the live frame rate.

Increasing the live frame rate will allow the recorded frame rate to be higher in System Administration, up to the level of the live frame rate.

Applies To

OnGuard All versions

LNVR (All versions)

Additional Information

None
