Question

How do I make the background of my badge transparent using chromakey?

Answer

follow these steps:

1. Start BadgeDesigner and open the badge layout.
2. Right-click the object on the badge requiring a transparent background and select **Properties**.
3. Change the **Transparent Background** property to **Yes**, then click [OK].
4. Save the badge layout.

The background image should now be transparent.

Applies To

OnGuard (All versions)
