

# "Error 1904. Module InrJpCap.dll failed to register" during installation of OnGuard

Last Modified on 01/14/2022 11:23 am EST

## Symptom

During installation of OnGuard, you may encounter the following error:

"Error 1904. Module InrJpCap.dll failed to register."

## Resolution

This error occurs when a DLL for a project-specific DVR attempts to load and cannot. For typical Lenel DVR installations, this error can be safely ignored. The following procedure to allow the special JnPng DVR to operate properly only needs to be executed if the JnPng DVR is installed on your system. Note that the JnPng DVR is not supported for general use.

- 1) Click the **Start** button, then select **Run**.
- 2) Type the following command in the **Open** field.  
regsvr32 "C:\Program Files\Common Files\Lenel\InrJpCap.dll"
- 3) Click [OK]. A confirmation dialog should appear indicating the file was registered successfully.

## Applies To

OnGuard 2008 Plus (6.1.222) or later

## Additional Information

None
