ACS.INI File Cannot be Edited by Administrator Group Member

Last Modified on 11/24/2021 10:53 am EST

Problem Overview

ACS.INI File Cannot be Edited by Administrator Group Member

Detailed Description

By default, the Admin account does not have permission to save the **ACS.INI** file in Windows . To work around this issue, add the Admin user to the **ACS.INI** file security settings and allow full control or run the application that you use to edit the **ACS.INI** file (i.e., Notepad) using the "Run As Administrator" option.

Applies To

OnGuard (All Versions)

Additional Information

None
