IntelligentVideo Database Upgrade Utility

Problem Overview

IntelligentVideo Database Upgrade Utility

Detailed Description

The IntelligentVideo Database Upgrade Utility is used to update IntelligentVideo event configurations to OnGuard 2010. This utility is found in the **Digital Video** folder on the Supplemental Materials disc, and should be run on the OnGuard database server as a final upgrade step.

Note: Prior to running this utility, make a backup of the **IVS.XML** file located on the IntelligentVideo Server at **/Documents and Settings/All Users/Application Data/Lenel/LNVSuite/IVS.XML**.

Applies To

OnGuard 2010 (6.4.500)

Additional Information

None
