How to enable verbose logging for Database Setup using the OnGuard Configuration Editor

Procedure Steps

For versions between OnGuard 6.0.148 To OnGuard 6.6, perform these steps to enable verbose logging for Database Setup:

1. Create a text file on the C: drive called **VerboseLog.txt.**
2. Open the OnGuard Configuration Editor from the OnGuard sub menu in the Start menu.
3. Select the **Components** tab and click **Add.**
4. Enter **Database** into the text box.
5. Set the drop down to verbose>.
6. Select the check box, and then select **File** > **Save.**
7. Select the **Listeners** tab and click **Add.**
8. Enter the name **VerboseLog.**
9. Browse to the file created in step 1 for the File name.
10. Set the type to **singleline.**
11. Set the severity to **verbose.**
12. Select the checkbox next to Name and then select **File** > **Save.**
13. Run Database Setup. Verbose logging will be written to the file created in step 1.

Applies To

OnGuard 2008 (6.0.148) to OnGuard 6.6
