

# Blank page after clicking finish when installing a new License file.

Last Modified on 05/20/2025 10:05 am EDT

## Symptom

Blank page in License Administration after clicking [Finish] when installing a new License file.

## Resolution

Delete any other License from License Administration so the only license showing in the drop-down list is the license you are installing.

## Applies To

OnGuard (All versions)

## Additional Information

If you plan to use client updater in the future you will need to add the older license file back to support this functionality.
