

What are the differences between NGP LED Modes and Mercury LED Modes?

Last Modified on 12/28/2021 11:57 am EST

Question

What are the differences between NGP LED modes and Mercury LED modes?

Answer

The NGP hardware platform is completely independent and separate from the Mercury platform. As a result, the reader LED patterns and behavior for the NGP and Mercury platforms are different.

The reader LED patterns and behavior for NGP can be provided upon request as a stand-alone document. As of OnGuard 6.5.xxx (Titan) or later, the information will be included as part of our standard documentation.

Applies To

NGP
