How to setup Basic SkyPoint V1 Integration in OnGuard

Procedure Steps

1. Install and configure NetDVMS Recorder/Cameras.
2. In the **NetDVMS Administrator > General Settings > NetCentral Settings:**
 - login*
 - password*
 - port = 1237
 - IP =
3. In the Image Server Administrator:
 - port = 8080 (*must* use this setting)
 - max. client connections = 0
 - Create a basic user account (admin level permissions)
 - username*
 - password*
4. In OnGuard **System Administration > Digital Video > Video Recorders:**
 - Add the NetDVMS recorder (the [Detect] button does not work for NetDVMS; must select manually)
 - username*
 - password*
 - Make sure the recorder comes online in Alarm Monitoring and Communication Server
5. Right-click on the NetDVMS recorder in System Administration, and then import cameras from the recorder (you will need the SkyPoint camera licenses at this point).

* All of these usernames and passwords must be *exactly* the same.

Applies To

OnGuard 2010 (6.4.500)

Third Party Hardware

SkyPoint V1
