

# What does a status of N/A mean next to the Microsoft Patch version on the website?

Last Modified on 12/28/2021 2:54 pm EST

## Question

What does a status of N/A mean next to the Microsoft Patch version on the website?

## Answer

N/A means it is not applicable to an OnGuard system, and therefore Lenel does not test it. We cannot say whether or not it is safe to apply. A good example is a security patch affecting Microsoft Office. Customers should not have Office installed on their OnGuard security system, so we do not test it.

## Applies To

OnGuard (All versions)

## Additional Information
