

Error on page when trying to activate FlexNet using IE8

Last Modified on 05/20/2025 9:49 am EDT

Symptom

When you select Activate for the FlexNet license, if using Internet Explorer 8, an error is shown on the page. The error details say **Cannot open an anonymous level security token in IE 8**.

Resolution

Change your dcom settings. Set them to Connect and Identify. If you can then activate the license, you can return the settings back to None and Impersonate.

Applies To

OnGuard (All versions)
