

SoapFault error 405 - Method Not Allowed

Last Modified on 04/03/2025 2:36 pm EDT

Symptom

Error shown when trying to run web-based Area Access Manager:

[SoapFault_EmptyResponse_Message] HTTP 405 - Method Not Allowed

Resolution

Check in the properties of **LnI.OC.WebService > Properties > Virtual Directory > Configuration**. If either ASPX or ASMX are not listed, it can cause the 405 error. If missing, click [Add] and add the missing application mapping.

Applies To

Browser-Based Applications

OnGuard (All versions)
