

The specified schema name "LENEL" either does not exist or you do not have permission to use it

Last Modified on 01/07/2022 3:49 pm EST

Symptom

When running Database Setup, an error occurs:

Description: Database error: The specified schema name "LENEL" either does not exist or you do not have permission to use it.
Details: Database error executing a statement. (CREATE TABLE LENEL.CCTVDEVICE_CONNECTION (CCTVDEVICEID SMALLINT NOT NULL, PANELID SMALLINT NOT NULL, RTP_PROTOCOL INTEGER DEFAULT -2 NOT NULL, RTSP_PORT INTEGER DEFAULT 0 NOT NULL)) on line 1, error number=2760, state=1, source=.Net SqlClient Data Provider on MATTS-VM SQL error [0]: The specified schema name "LENEL" either does not exist or you do not have permission to use it. on line 1, class=16, error number=2760, state=1, source=.Net SqlClient Data Provider on

Resolution

Open the configuration utility used for editing the application.config file and make sure the schema owner is set to **dbo** instead of **lenel**.
