

# Blank Configuration Editor

Last Modified on 05/19/2025 9:17 am EDT

## Symptom

The Configuration Editor is blank.

## Resolution

1. Locate the **application.config** file and check the file name.
2. Change the file name so that it is just **applicaiton.config**. Make sure the file does not have any type of date in the file name.
3. Restart Configuration Editor.

## Applies To

OnGuard (All versions)

## Additional Information
