

Blank Configuration Editor

Last Modified on 01/10/2022 4:00 pm EST

Symptom

The Configuration Editor is blank.

Resolution

1. Locate the **application.config** file and check the file name.
2. Change the file name so that it is just **applicaiton.config**. Make sure the file does not have any type of date in the file name.
3. Restart Configuration Editor.

Applies To

OnGuard (All versions)
