

Error when launching Device Discovery Console

Last Modified on 01/10/2022 3:50 pm EST

Symptom

When launching the Device Discovery Console, the following error appears:

```
Could not load file or assembly 'Microsoft.Practices.EnterpriseLibrary.Logging, Version=3.1.0.0, Culture=neutral, PublicKeyToken=b03f5f7f11d50a3a' or one of its dependencies. The system cannot find the file specified.
```

Resolution

This error occurs when key dll files are not copied to the **\OnGuard\Device Discovery** directory. Copy the following files from the OnGuard installation media to the **\OnGuard\Device Discovery** directory:

- Microsoft.Practices.EnterpriseLibrary.Logging.dll
- Microsoft.practices.enterprise.library.common.dll
- Microsoft.practices.objectbuilder.dll

The files can be found in the following directory: **\installation media\program files\OnGuard\Device Discovery**.

Make sure you are using media for the same version of OnGuard.

After the files are copied, the Device Discovery Console launches as expected.

Applies To

LNVR 6.3.249; LNVR 6.4.500
