

# Class encoding stop working error "the encoding failed do the Protected application error code 0x80042007"

Last Modified on 01/10/2022 4:09 pm EST

## Symptom

The following error appears when iClass encoding stops working:

"the encoding failed do the Protected application error code 0x80042007"

## Resolution

The card format for the Access Control Key Type was changed from **HID** to **Lenel**. To resolve this issue, change the card format back to **HID**.

## Applies To

OnGuard (All versions)

## Additional Information
