Question

Which features are lost if I disable Intrusion Command and Control (SWG-1620)?

Answer

If the Intrusion Command and Control (SWG-1620) feature is disabled, the following functions are lost for all Intrusion panels in OnGuard Alarm Monitoring:

- Arming/Disarming of alarm mask groups
- Arming/Disarming of intrusion mask groups
- Masking/Unmasking of individual alarm points
- Activating/Deactivating/Pulse of outputs
- Arming/Disarming of intrusion areas

Applies To

OnGuard (All versions)
