OnGuard Language Packs

Last Modified on 02/07/2022 3:22 pm EST

Symptom

Language Packs are not working properly in OnGuard

Resolution

It seems to be an issue in Windows – after few changes in regional settings on the workstation, the changes are not written to registry any more. (Even I had all the regional settings set for en-US, in Windows registry they still were Polish.)

To have OnGuard with specific language version you need to change Locale in HKEY_CURRENT_USER\Control Panel\International to the number you need (at http://msdn.microsoft.com/en-us/goglobal/bb964664.aspx you have the list of ID assigned to specific country/language) and when you log off and log on again, you have the OG with the language you prefer.

Applies To

OnGuard (All Versions)
