

CHECKSUM Error On Micro

Last Modified on 01/11/2022 11:03 am EST

Symptom

CHECKSUM error is appearing in Diag View for FCWnx and micro is experiencing various issues.

Resolution

The check needs to be reimaged (NOT REFLASHED!). In most cases, this would require the tech to send the SIMM in for us to reimage. If the tech is experienced and familiar with reimaging, they can do it themselves.

Applies To

FCWnx
