

# Zebra ZXP Series 8 printer fails to encode magnetic cards

Last Modified on 01/14/2022 10:13 am EST

## Symptom

When attempting to inline encode a magnetic card in a Zebra ZXP Series 8 badge printer, there will be no errors or issues with the process, but the card will not be encoded.

This is the case even though all configuration for inline magnetic encoding has been properly performed in System Administration.

The printer driver in use is revision 1.00.00.

## Resolution

To resolve the issue, install driver revision 1.01.44.00 for the Zebra ZXP Series 8 printer.

## Applies To

OnGuard 2009 (6.3.249) or later  
Zebra ZXP Series 8 printers

## Additional Information

None
