

Error received when opening Alarm Lite

Last Modified on 01/11/2022 1:23 pm EST

Symptom

The following error occurs when launching Alarm Lite:

"HTTP could not register URL `http://+:35555/`. Your process does not have access rights to this namespace (see <http://go.microsoft.com/fwlink/?linkid=70353> for details)"

Resolution

1. Navigate to **Start > Run**.
2. Type **Netsh.exea**.
3. At the **netsh** prompt, type **netsh http add urlacl url=http://=35555/ user =DOMAIN/User**.
4. Replace **DOMAIN/User** with the domain and user account that is trying to access Alarm Lite.

Applies To

Alarm Lite

Additional Information

Other services and applications may report the same "HTTP could not register URL" error. The above Microsoft KB can still be applied to help resolve the issue, however the port may be different.
