

Unable To Obtain Badge Field Data From Database

Last Modified on 06/09/2025 3:54 pm EDT

Symptom

The following error may occur when attempting to print a badge:

Unable to obtain badge field data from database.

Additional Information: Database error (Imaging Error Code=0x6E93.) The record for this cardholder is missing information needed for printing. The most likely cause is a missing value for one or more drop-down list fields. To fix the problem, search up the record (via badge ID), modify the record, verify that each drop-down field to be printed has a value, and click OK. Badge layout in error: BadgeLayoutName (ID=7)

Resolution

1. Log into System Administration.
2. Navigate to **Administration > List Builder**.
3. Select **Validate Lists** for each item in the badge layout that uses data from a drop down field.
4. Attempt printing the badge again.

Applies To

OnGuard (all versions)

Additional Information
