

License Server displays "Page cannot be displayed" when attempting to update an existing license file

Last Modified on 01/05/2022 12:53 pm EST

Symptom

License Server displays "Page cannot be displayed" when attempting to update an existing license file.

Resolution

1. Stop the License Server.
2. Delete the **.lic** files in the **\OnGuard\LicenseServerConfig\Licenses** folder.
3. Start the License Server service.
4. Log into License Administration, and then install the license file.

Applies To

OnGuard (All versions)

Additional Information

This issue can occur when there is a lock on the license file by the License Server or some other process.
