Upgrading Java to Java 8 for OnGuard 7.4 or later

Last Modified on 01/12/2022 9:15 am EST

Symptom

Customers want to use JRE 1.8 (Java 8) in their OnGuard 7.4 environment.

Resolution

The license server is the only application that relies on Java. JRE 1.8. This has been tested, and OnGuard 7.4 does support it. However, the customer will need to download JRE 1.8 separately, and then install it manually.

For the latest Java release, use the following link:

https://www.java.com/en/download/

Applies To

7.4 or later

Additional Information

OnGuard 7.4 installations ship with an older version of Java. OnGuard 7.5 installations will deliver JRE 1.8.
