	Database Setup This step was skipped.
 Finished 	Database Setup (Archiva) This step was skipped.
	Service Startup This step was skipped.
	LS Message Broker Service This step was skipped.
	Close

Resolution

Replace the **application.config** file with one that works correctly, and make sure that the information inside the file is modified as necessary for the current workstation.

Point it to where the database files are located, not the default C:\Program Files(86)\OnGuard.

Applies To

OnGuard (all versions)
