Invalid card format error using Government CAC credentials with OSDP

Last Modified on 06/04/2025 3:54 pm EDT

Symptom

When using government CAC credentials with OSDP reader ports, an invalid card format error is received for valid credential reads.

Resolution

Add the following option to the ACS.INI file to work with a magnetic format over OSDP reader: [CommunicationServer]MagWithOSDPOutFormat=4You may also need to obtain a dedicated version of dll files from technical support along with detailed information about applying this option.

Applies To

OnGuard 7.3

OnGuard 7.4

OnGuard 7.5
