Replication Administration shows "To do – Awaiting Processing at Destination" status after Replicator is run on a segmented system

Last Modified on 02/07/2022 11:04 am EST

Symptom

Replication Administration shows "To do – Awaiting Processing at Destination" status after Replicator runs on a segmented system.

Resolution

Use the following steps to see a successful status in Replication Administration:

1. Using SQL Management Studio, log into the **accesscontrol** database.
2. Run the following query:
   UPDATE [AccessControl].[dbo].[BDG2TRN] SET TRANSTATUS = 0 where TRANSTATUS=5
3. In Replication Administration, select **Master > Enterprise Transaction**.
4. From Transaction to view, click [Requery]. The status will change from "To do – Awaiting Processing at Destination" to "To do" and then after processing "Success".

Applies To

OnGuard 7.5 Update 1
