

# How to enable a PIV or CAC enrollment reader

Last Modified on 02/07/2022 11:23 am EST

How to enable a PIV or CAC enrollment reader.

## Procedure Steps

In System Administration, select **Administration > Workstations**.

1. Click [Add] at the bottom and add your workstation.
  2. Click [Browse] next to Name and select your computer.
  3. Leave all other settings default and click [OK].
  4. Select the **Encoders/Scanners** tab.
  5. Click [Add] to create a new encoder.
  6. Provide the new encoder with a name, and select the workstation you just created.
  7. Under **Device type**, select **PC/SC Encoder**.
  8. Under Credential technology, leave the default setting **Contact Smart Chip**.
- 
9. Select the **Location** tab and leave it marked as a stand-alone device.
  10. Select the **Communications** tab.
  11. Select the driver for the Omnikey reader you connected to the workstation.
  12. Click [OK] to save the device.
- 

## Applies To

OnGuard 7.2 and later

## Additional Information

You can obtain the latest driver from the manufacturer's website.
