Which Mercury Panels Support Downstream I/O's?

Last Modified on 10/12/2023 7:24 am EDT

Resolution

As of NetBox version 5.1, the following Mercury panels can have up to 64 SIOs: the EP-Series (EP1502 and EP2500 only), LP-Series (LP1502 and LP2500 only), M5 Bridge, and Mercury-powered Honeywell PW-Series Intelligent Controllers. **Note that LenelS2 does not support downstream I/O's on the EP1501 and LP1501.**

Applies To

- NetBox version 5.1 and later
- Mercury EP-Series (EP1501, EP1502, and EP2500)
- LP-Series (LP1501, LP1502, and LP2500)
- M5 Bridge
- Mercury-powered Honeywell PW-Series Intelligent Controllers
