

Can't save to NC: error operator does not exist: character varying = bytea Hint: No operator matches the given name and argument type(s). You might need to add explicit type casts.

Last Modified on 10/07/2025 9:26 am EDT

Try to resynch in Global to an NC, or even save a person to the NC and get:

error operator does not exist: character varying = bytea

Hint: No operator matches the given name and argument type(s). You might need to add explicit type casts.

If the admin user on the NC doesn't have a username/password:

```
begin;  
update person set s2ncpassword=set_password ('xxxx'), s2ncusername ='admin' where id =1;  
insert into persontorole (personid, roleid) values (1, 4);  
commit;
```

Where xxxx equals the password.

On really old versions, it's  
set s2ncpassword=password('xxxx')
