

# New NC stuck initializing, has partitions but data conflicts don't come up

Last Modified on 10/07/2025 9:22 am EDT

If you are adding a new controller to Global and it's stuck initializing, the partitions have come across to the NC but not the Global System Administrator user, and the data conflicts messages never came up in Global, check the NC database:

s2sync.state.startup should be set to RUNNING
